Our Audience

Welcome to your Customer Service module of the iPS Back-Office Manager application. As a Customer Service Representative (CSR) or CS Manager, this module provides access to many component modules for operating key business functions, such as customers, members, orders, products, payments, cancellations, shipments, returns and more.

This guide will assist the user in leveraging the full potential of iPS features and functionality. Also, it will make the user understand how front- and back-office operations of iPS are integrated.

Note:

Within the context of this guide, a “product” represents an inventoried or service item that is available for sale on your Web store. Throughout this guide, “product” and “item” are used interchangeably. Furthermore, “the system” refers to all functions and features offered by IPS. New versions of this guide will periodically be released to reflect enhancements that become available with each future release of iPS.

Requirements for using iPS Back-Office Manager module

You are required to have the following:

1. Access to the Internet
2. A recent version of any standard Internet browser, such as:
 - ☐ Internet Explorer
 - ☐ Mozilla Firefox
 - ☐ Safari (Win or Mac)
 - or
 - ☐ Google Chrome
3. Access to the inPowerSuite application launch page
4. Have an authorized iPS username and password

Text Conventions

This section describes several basic conventions that are used throughout the back-office guide. They will help the user understand the instructions and become a productive user of inPowerSuite.

1. Menu selections are depicted with a bar (|) separator, as follows:

Main menu | Submenu | Menu-item

2. From any module in iPS 's System Administration application, click **Help | About This Module**, for a description of the module and definitions of the fields contained within it.
3. Step-by-step instructions are displayed as follows:

Step	Action
1 of N	Description of step 1
2 of N	Description of step 2
...	

4. Buttons are depicted with braces [] as follows: **[Find]** button
5. Links are depicted with bold letters as follows: **Quick Order**
6. Sample field values are depicted with an input box, as follows:
7. TiPS are provided throughout this guide and include helpful hints, shortcuts and recommendations on how you can improve use of and navigation through the system. TiPS are highlighted and displayed as follows: **TIP**
8. Supplemental explanations are presented as follows: NOTE:
9. Warnings are presented as follows: **Warning:**

Accessing iPS Applications

Niche provides each client with a personalized landing page containing several links to access iPS application components by environment, as follows:

Application Links - PRODUCTION	Application Links - TEST	Support Links
Web Store	Web Store	ProjectWatch
iPS Back-Office Manager	iPS Back-Office Manager	
iPS SysAdmin Manager	iPS SysAdmin Manager	Document Library
Website Wizard	Website Wizard	
Website Wizard Manager	Website Wizard Manager	

NOTE: Each client's landing page will contain the application components matching their iPS configuration and this document will primarily focus on the following application components:

iPS Back-Office Manager and **Web Store**.

Customer Service Overview

inPowerSuite provides powerful, yet easy-to-use Web-based customer inquiry, order entry and maintenance functions to registered back-office users. Unlike traditional customer service applications, iPS only requires a user to have a Web browser and a valid login in order to perform all customer relationship management (CRM) and order management functions. Therefore, authorized users conveniently can perform their duties from any location as long as there is Internet access.

In addition, iPS introduces an innovative design for order management. Rather than the traditional configuration of a front-end shopping screen for customers and a separate order entry screen for back-office customer service representatives (CSRs), iPS offers the same order entry screens for both user roles.

Whenever the CSR handles a call to place an order, a CRM screen will be provided that allows the CSR to query up the customer. From the customer record, the CSR can choose the **[Place Order for Customer]** button to go "on behalf of" that customer directly into the front-end shopping site to perform web order entry. This does not require the customer's username and password. At the front-end shopping site, the CSR is now logged into the store as the customer and has access to the same features and functionality including Quick Order processing.

Customer Management

A logged-in CSR can perform the following CRM functions for a customer:

- ☐ Query (Lookup) Customers
- ☐ New Customers and Members
 - ☐ New Customer
 - ☐ New Preferred Customer
 - ☐ New Member
- ☐ Maintain Customer Notes
 - ☐ Create a Note
 - ☐ Follow-up on (Close) a Note
- ☐ Maintain Customer Profile
- ☐ Maintain Customer Billing and Shipping Addresses
- ☐ Maintain Customer Telephones
- ☐ Maintain Customer Payment Methods
- ☐ Maintain Customer Reward Transactions
- ☐ Maintain Customer Email Campaign Selections

Order Entry / Management

A logged-in CSR can perform the following order entry operations:

- ☐ Place an Order / Quick Order
- ☐ Query (lookup) Orders
- ☐ Handle Unfinished Orders
- ☐ Review Order Lines
- ☐ Cancel an Order
- ☐ Cancel an Order Line

Return Management

- ☐ Create a Return
- ☐ Change Tax Amount of the Return
- ☐ Enter Miscellaneous Reimbursement Amount
- ☐ Delete the Entire Return Record
- ☐ Manually Update Return Quantity
- ☐ Manually Remove Entire Line
- ☐ Manually Enter a Return Reason
- ☐ Manually Update Received Quantity
- ☐ Manually Issue Return Payments

Customer Management

Query (Lookup) Customers

This simple function helps you to locate customers that are stored in the inPowerSuite's (IPS) database.

Step	Action
1 of 6	Select from menu: Customers Customer Customer Maintenance
2 of 6	Enter search criteria, consisting of any combination of the following values: ☐ Customer Number ☐ Member ☐ First Name (<i>of customer</i>) ☐ Last Name (<i>of customer</i>) ☐ Customer Type (<i>customer retail, customer wholesale or distributor wholesale</i>) ☐ Customer Status (<i>active, new or suspended</i>) ☐ Company Name ☐ Billing Email ☐ Username (<i>of customer</i>) ☐ Inactive (<i>yes/no</i>) ☐ Sales Person Last Name TIP: Use the percent (%) character before and/or after the search argument to perform inexact searches. For example, to find: ☐ Last names starting with "john", enter john% ☐ Last names ending with "son", enter %son ☐ Last names containing "man", enter %man%
3 of 6	Click the [Find] button
4 of 6	If an exact match was found, the full record of the customer will be displayed. Otherwise proceed to step 5.

Step	Action
5 of 6	If your search matched more than one record, a record list will be displayed. You may now perform any of the following commands: a) Click the appropriate link (i.e. Customer Number) in the first column of the record list to display the full record of the customer you are trying to locate. b) Click the [First] / [Previous] / [Next] / [Last] buttons to scroll through the list of records. c) Click [Requery] to rerun the same query. d) Click [Count] to calculate the number of records that match your search criteria. e) Click [Query] to perform a new search.
6 of 6	Review the order. <u>NOTE:</u> The Fact Sheet link will take you to the Customer Fact Sheet screen.

New Customers and Members

inPowerSuite (IPS) supports multiple pre-configured customer types. Each customer type will have access to unique shopping options and tools, as well as a customized "MyAccount" area.

- ☐ New Customer
- ☐ New Preferred Customer
- ☐ New Member

New Customer

Sign up a new (retail) customer.

Step	Action
1 of 3	Select from menu: Customers Customer Customer Maintenance
2 of 3	Click the [New Customer] button to create a new (retail) customer. <u>NOTE:</u> iPS automatically launches a new browser session for the Web store.

Step	Action
3 of 3	Add products to the cart and checkout “on behalf of” the new customer. TIP: Click the Quick Order link to add multiple items to the cart simultaneously.

New Preferred Customer

Sign up a new customer on a discount pricelist.

Step	Action
1 of 3	Select from menu: Customers Customer Customer Maintenance
2 of 3	Click the [New Preferred Customer] button to create a new customer on a discount pricelist. <u>NOTE:</u> iPS launches a new browser session for the Web store. Also, iPS will automatically add a membership item (starter kit) to the cart. Typically, the membership item is linked to the discount pricelist.
3 of 3	Optionally, add more items to the cart and check out “on behalf of” the new preferred customer. TIP: Click the Quick Order link to add multiple items to the cart simultaneously. TIP: If you remove the membership item from the cart, all remaining items will automatically adjust to retail pricing. If you decide to add the membership item back to the cart, all existing items will automatically readjust to the discounted pricing.

New Member

Sign up a new member from a mailed-in, faxed-in or phoned-in application.

Step	Action
1 of 4	Select from menu: Customers Customer Customer Maintenance, or Select from menu: Customers Members
2 of 4	Click the [New Member] button to create a new consultant or distributor. NOTE: iPS automatically launches a new browser session for the Web store and will add a membership item (starter kit) to the cart.
3 of 4	Optionally, add more products to the cart and check out on behalf of the new member. TIP: Click the Quick Order link to add multiple items to the cart simultaneously.
4 of 4	Complete the application "on behalf of" the new member.

Maintain Customer Notes

You may create one or more notes with regards to a customer. For example, a note may be created to remind you that an outstanding issue requires action.

The action status of a note may be "Open" or "Closed". When status is "Open", a popup window will alert you that a note requires action. The popup window will appear each time you access a customer maintenance record.

Create a note.

Step	Action
1 of 4	Query an existing customer (see Query (Lookup) Customers).
2 of 4	Click the [New] button (located in the Notes area of the customer record).
3 of 4	Create a note by: a) Indicating a type, by selecting "General" or "To Do" from the drop-down list in the Note Type field, and b) Entering a description of the note in the Note field.

Step	Action
4 of 4	Click the [Create] button. NOTE: The action status of the note will be "Open". As a result, whenever you access the record for this customer, a popup window will appear alerting you that a note requires action.

Follow-up on (Close) a Note.

When the status of any of the notes for a customer is "Open", a popup window will alert you that a note requires action. The popup window will appear each time you access a customer maintenance record. To close a note, follow these steps.

Step	Action
1 of 6	Query an existing customer (see Query (Lookup) Customers).
2 of 6	Open a note in "Open" status by clicking the active link for the note in the Notes area. System will redirect you to the Customer Notes module.
3 of 6	To close the note, simply check the Closed checkbox. NOTE: You may also simply update the information in the Note and Comments field, without formally closing the note.
4 of 6	Optionally, enter a comment in the Comments field, describing the follow-up status of the action recommended in the Note field.
5 of 6	Click the [Update] button to confirm the changes.
6 of 6	To return to the customer record, click the Customer # link in the customer info area.

Maintain Customer Profile

You may update the existing profile of a customer by changing the values of the fields that are contained within the customer maintenance record.

In addition, the customer record provides several links that redirect you to the customer-specific record of different modules. This enables you to make updates to other modules specifically for that customer as well.

Step	Action
1 of 3	Query an existing customer (see Query (Lookup) Customers).
2 of 3	In case you want to update the customer record, make the appropriate changes to one or more fields within the record that are updatable. Subsequently, click the [Save Changes] button to confirm the changes.

Step	Action
	If you want to make changes to the customer-specific record of a different module, proceed to step 3.
3 of 3	Click any link that will redirect you to a different module. a) Make changes to the customer-specific record. b) Depending on the module, save changes by clicking the [Update] or [Save Changes] button. c) Depending on the module, to return to the original customer record: i. Click the Customer # link in the customer info area, or ii. Click the Customer link, or iii. Simply click the Back button in the toolbar.

Maintain Customer Billing and Shipping Addresses

When in the customer maintenance record, you may add a new customer address or change any existing address. A customer address may be designated as "Primary" and/or "Shipping" and/or "Billing".

Step	Action
1 of 4	Query an existing customer (see Query (Lookup) Customers).
2 of 4	To add a new address, click the [New] button in the Addresses area of the customer record. a) Enter the address information. b) Designate the address as "Primary" and/or "Shipping" and/or "Billing". <i>NOTE:</i> Only one address for the selected customer can be designated as the "Primary" address. c) Click the [Insert] button to save the address record. To change an existing address, proceed to step 3.
3 of 4	Click the link (first line of the street address) of the address you want to change. a) Make any changes to the fields that are updatable for this address record. b) Click the [Update] button to save the changes.
4 of 4	To return to the customer record, click the Customer # link in the customer info area.

Maintain Customer Telephones

When in the customer maintenance record, you may add a new customer telephone number or change any existing number. A customer telephone number may be designated as "Business", "Car", "Cell", "Fax", "Home" or "Pager".

Step	Action
1 of 4	Query an existing customer (see Query (Lookup) Customers).
2 of 4	To add a new telephone number, click the [New] button in the Telephones area of the customer record. a) Enter the telephone information. <i>NOTE:</i> In the Type field, designate the address as "Business", "Car", "Cell", "Fax", "Home" or "Pager". b) Click the [Insert] button to save the address record. To change an existing telephone record, proceed to step 3.
3 of 4	Click the link of the telephone number you want to change. a) Make any changes to the fields that are updatable for this telephone record. b) Click the [Update] button to save the changes.
4 of 4	To return to the customer record, click the Customer # link in the customer info area.

Maintain Customer Payment Methods

When in the customer record, you may add a new customer payment method or change any existing method. Payment methods are classified under credit cards or other payment methods.

Step	Action
1 of 4	Query an existing customer (see Query (Lookup) Customers).
2 of 4	To add a new record when payment method is a a) Credit card: i. Click the [Add Credit Card] button in the Payment Methods area of the customer record. ii. Enter the credit card information. <i>NOTE:</i> In the Payment Method field, select the appropriate credit card from the drop-down list.

Step	Action
	iii. Click the [Insert] button to save the payment method record. b) Other than credit card: i. Click the [Add Other Method] button in the Payment Methods area of the customer record. ii. Enter the payment information. <u>NOTE:</u> In the Payment Method field, select the appropriate method from the drop-down list. iii. Click the [Insert] button to save the payment method record. To change an existing payment method, proceed to step 3.
3 of 4	Click the Account # link of the payment method you want to change. a) Make any changes to the fields that are updatable for this payment method record. <u>NOTE:</u> If you need to change the credit card number, enter a new number in the New Credit Card Number field. b) Click the [Update] button to save the changes.
4 of 4	To return to the customer record, click the Customer # link in the customer info area.

Maintain Customer Reward Transactions

When in the customer record, you may give a certain amount of reward points to the customer. Award points may be given to the customer for a variety of reasons, such as an ongoing promotion or a purchase incentive.

Only use this option in case your company has a reward points system in place.

Step	Action
1 of 4	Query an existing customer (see Query (Lookup) Customers).
2 of 4	To assign reward points to the customer, click the [New] button in the Reward Transactions area. <u>NOTE:</u> Specify the reason for the reward transaction in the Reward Reason Code field by selecting the appropriate value from the drop-down list.
3 of 4	Click the [Update] button to save the record.
4 of 4	To return to the customer record, click the Customer # link in the customer info area.

Maintain Customer Email Campaign Selections

When in the customer record, you may manually opt a customer into or out of a marketing campaign category (in case the campaign is permission-based).

Step	Action
1 of 4	Query an existing customer (see Query (Lookup) Customers).
2 of 4	To opt a customer into a campaign category, click the [New] button in the Campaign Selections area of the customer record. a) Indicate the campaign category by clicking the lookup button next to the Campaign Category field and selecting the appropriate value. b) Click the [Insert] button to save the record. To opt a customer out of a campaign category, proceed to step 3.
3 of 4	Click the link of the campaign category that you want to opt the customer out of. a) Indicate a date in the Opt Out Date field. b) Click the [Insert] button to save the update.
4 of 4	To return to the customer record, click the Customer # link in the customer info area.

Order Entry / Management

Place an Order “on behalf of”

After querying a customer or member (see Query (Lookup) Customers), you may place an order on his/her behalf directly from the front-end Web store.

inPowerSuite (IPS) provides the ability for Customer Service Representatives (CSRs) to automatically sign in and shop “on behalf of” the customer (or member). This operation is fully secure and does not require the customer’s username and password. Also, iPS will automatically display item prices that apply to the customer type you are dealing with.

Step	Action
1 of 3	Query an existing customer or member.
2 of 3	Click the [Place Order for Customer] button. <i>NOTE: iPS will open a second browser session while the customer or member is already signed in. Note the indication of “CSR on behalf of Customer” on your screen!</i>
3 of 3	After completing the order, sign out and close the shopping browser.

Query (Lookup) Orders

Step	Action
1 of 5	Select from menu: Order order Maintenance
2 of 5	Enter search criteria, consisting of any combination of the following values: ☐ Order Number ☐ Customer Number ☐ Order Type (<i>order, subscription, no charge or autoship</i>) ☐ Order Date ☐ Order Status ☐ First Name ☐ Last Name ☐ Company Name ☐ City ☐ State ☐ Postal Code ☐ Email ☐ Order Source (<i>sales channel through which the transaction took place</i>)

Step	Action
	TIP: Use the percent (%) character before and/or after the search argument to perform inexact searches. For example, to find: ☐ Last names starting with "john", enter john% ☐ Last names ending with "son", enter %son ☐ Last names containing "man", enter %man%
3 of 5	Click the [Find] button
4 of 5	If an exact match was found, the full record of the order will be displayed. Otherwise proceed to step 5.
5 of 5	If your search matched more than one record, a record list will be displayed. You may now perform any of the following commands: a) Click the appropriate link (i.e. Order Number) in the first column of the record list to display the full record of the order you are trying to locate. b) Click the [First] / [Previous] / [Next] / [Last] buttons to scroll through the list of records. c) Click [Requery] to rerun the same query. d) Click [Count] to calculate the number of records that match your search criteria. e) Click [Query] to perform a new search.

Handle Unfinished Orders

You may complete an unfinished order "on behalf of" a customer. The status of an unfinished order is always "New", implying that the customer has placed items in the shopping cart but that no payment as of yet has been authorized.

Step	Action
1 of 3	Query the order you want to complete (see Query (Lookup) Orders).
2 of 3	Click the Continue Order link. <u>NOTE:</u> The Continue Order link will only appear for orders in "New" status.

Step	Action
	NOTE: iPS will open a second browser session while the customer or member is already signed in. Note the indication of "CSR on behalf of Customer" on your screen!
3 of 3	After completing the order, sign out and close the shopping browser.

Review Order Lines

A purchase order consists of one or more order lines. An order line represents the total quantity of an item (i.e., same product number) within the order.

Step	Action
1 of 5	Query the order for which you want to review the separate lines (see Query (Lookup) Orders).
2 of 5	Click the Order Lines link. Link will take you to the order line module.
3 of 5	If an exact match was found (order consists of only one line), the full record of the order line will be displayed. Otherwise proceed to step 4.
4 of 5	If your search matched more than one record, a record list will be displayed. You may now perform any of the following commands: a) Click the appropriate link (i.e. Line Number) in the first column of the record list to display the full record of the order line you are trying to view. b) Click the [First] / [Previous] / [Next] / [Last] buttons to scroll through the list of records. c) Click [Requery] to rerun the same query. d) Click [Count] to calculate the number of records that match your search criteria. e) Click [Query] to perform a new search.
5 of 5	Review the order line details. NOTE: Prior to shipment of this order line, you may add a shipper comment, ship to comment and a gift message, or change the warehouse from which the order line will be shipped.

Cancel an Order

You may cancel an entire order only if *none* of the items within that order have been shipped.

Step	Action
1 of 3	Query the order you want to cancel (see Query (Lookup) Orders).
2 of 3	a) Click the [Cancel Order] button. b) Click OK to confirm, otherwise select cancel. NOTE: System will prevent the cancellation in case (part of) the order has already been shipped. A popup window will be displayed explaining the reason why. TIP: In case system does not allow the cancellation, you may still cancel any order lines within the order that are not already in "Shipped" status (also see Cancel an Order Line). a) Click the Order Line link. b) On the record for the order line, click the [Cancel Order Line] button.
3 of 3	Depending on the tax calculation arrangement, you may consider voiding the sales tax record for any order (in "Booked" status) that you cancelled.

Cancel an Order Line

You may cancel an entire order line only if *none* of the items within that order line have been shipped.

Step	Action
1 of 4	Query the order of which the order line is part (see Query (Lookup) Orders).
2 of 4	Click the Order Line link. System will redirect you to the order line module.
3 of 4	a) On the order line record, click the [Cancel Order] button. b) Click OK to confirm, otherwise select cancel. NOTE: System will prevent the cancellation in case (part of) the order line has already been shipped. A popup window will be displayed explaining the reason why.
4 of 4	Depending on the tax calculation arrangement, you may consider voiding the sales tax record

Step	Action
	for any order line (in "Booked" status) that you cancelled.

Return Management

inPowerSuite (IPS) provides a simple method for calculating and issuing a return payment to the customer.

The system will automatically create a return for an entire order. Subsequently, the Customer Service Representative (CSR) may manually change return quantities, change return total, select a payment method for the return, and more.

- ☐ Prerequisites
- ☐ Summary of Steps
- ☐ Create a Return
- ☐ Change Tax Amount of the Return
- ☐ Enter Miscellaneous Reimbursement Amount
- ☐ Delete the Entire Return Record
- ☐ Manually Update Return Quantity
- ☐ Manually Remove Entire Line
- ☐ Manually Enter a Return Reason
- ☐ Manually Update Received Quantity
- ☐ Manually Issue Return Payment - Same Payment Method
- ☐ Manually Issue Return Payment - Different Payment Method
- ☐ Manually Recuparate Sales Tax
- ☐ Make a Warehouse Transfer

Prerequisites

- ☐ CSR may instruct the system to create a return for any order that is in "Shipped" status.
 - ☐ Subsequently, system will automatically create a return (and calculate a return total) for all items within an order that have been shipped.
- ☐ CSR may manually change return quantities, change return tax total and miscellaneous reimbursement amounts, update received quantities, select a payment method for the return, and more.
- ☐ System will issue return payment using the same payment method as the one initially used to pay the order, unless other payment method is selected.

Summary of Steps

Step	Action
1 of 5	Query a "Shipped" order.
2 of 5	Create a return by clicking the [Create Return] button. <u>NOTE:</u> System will automatically create a return maintenance record (including calculating return total) for all shipped items within the order. <u>NOTE:</u> System will generate a return number, which is equivalent to the Return Merchandise Authorization (RMA) number.
3 of 5	If needed, update the return tax and miscellaneous reimbursement amounts. <u>NOTE:</u> iPS will prevent reimbursements greater than the original order total, unless system has been configured differently.
4 of 5	Manually remove item(s) within line that should not be returned. Or Manually remove an entire line within the return.
5 of 5	Once all items within the return have been received back at a warehouse (order status changes to "Accepted"), a return payment may be issued. <u>NOTE:</u> Payment method used to issue the return method may be the same one used to pay for the order, or may be different.

Create a Return

System allows you to automatically create a return (including calculating return total) for an entire order in "Shipped" status. Return will be created for all shipped items within the order.

Step	Action
1 of 4	Select from menu: Orders Order Maintenance
2 of 4	Query a "Shipped" order.
3 of 4	a) Create a return by clicking the [Create Return] button. <u>NOTE:</u> [Create Return] button only appears on the screen when the order is in "Shipped" status.

Step	Action
	b) Click OK to confirm, otherwise select cancel. NOTE: System will generate a return number, which is equivalent to the Return Merchandise Authorization (RMA) number. NOTE: Return total will be credited using the same payment method as the one initially used by the customer to pay for the order, unless other payment method is specified.
4 of 4	Review the return details.

Change Tax Amount of the Return

iPS automatically estimates the tax amount to be reimbursed to the customer. To change the tax total, follow these steps.

Step	Action
1 of 2	Change the value in the Return Tax Total field. NOTE: Value may contain two decimal places.
2 of 2	Click the [Update] button. NOTE: iPS will prevent reimbursements greater than the original order total, unless system is configured such that return total may exceed original order total by x percent.

Enter Miscellaneous Reimbursement Amount

Any other amount that needs to be reimbursed to the customer should be entered as follows.

Step	Action
1 of 2	Enter a value in the Misc Reimb Amount field. NOTE: Value may contain two decimal places. TIP: For example, use the miscellaneous reimbursement field to credit the shipping and handling charges or restocking fee to the customer.
2 of 2	Click the [Update] button. NOTE: iPS will prevent reimbursements greater than the original order total, unless system

Step	Action
	is configured such that return total may exceed order total by x percent.

Delete the Entire Return Record

Step	Action
1 of 1	a) Click the [Delete] button. b) Click OK to confirm, otherwise select cancel. <u>NOTE:</u> Entire record can only be deleted after all lines within this return have been manually removed (see Manually Remove Entire Line from a Return).

Manually Update Return Quantity

You may manually update the quantity that should be returned, by order line.

Step	Action
1 of 4	Click the Product # link of the line for which the return quantity should be updated. <u>NOTE:</u> iPS will redirect you to a separate screen where you can update the return quantity.
2 of 4	a) Change the value in the Return Qty field. b) Enter the reason for the return in the Return Reason field. <u>NOTE:</u> Value in the Return Qty field must be greater than 0, but may not exceed value in the Ordered Qty field.
3 of 4	Click the [Update] button.
4 of 4	Click the Back to Return link, which will redirect you to the main return maintenance screen. <u>NOTE:</u> After updating the quantity of the line, system will automatically recalculate the return total.

Manually Remove Entire Line

Alternatively, you may remove an entire order line from the return.

Step	Action
1 of 3	Click the Product # link of the line within the return that you wish to remove. <u>NOTE:</u> iPS will redirect you to a separate screen where you can delete the line.
2 of 3	a) Click the [Delete] button. b) Click OK to confirm, otherwise select cancel.
3 of 3	Click the Back to Return link, which will redirect you to the main return maintenance screen. <u>NOTE:</u> After removing the line, system will automatically recalculate the return total.

Manually Enter a Return Reason

You may manually record a reason for the return, by order line.

Step	Action
1 of 4	Click the Product # link of the line for which the return reason should be recorded. <u>NOTE:</u> iPS will redirect you to a separate screen where you can enter the reason.
2 of 4	In the Return Reason field, select the appropriate reason from the drop-down list.
3 of 4	Click the [Update] button.
4 of 4	Click the Back to Return link, which will redirect you to the main return maintenance screen.

Manually Update Received Quantity

You may manually update the quantity that was received back at the warehouse, by order line.

Step	Action
1 of 4	Click the Product # link of the line for which the received quantity should be updated. <u>NOTE:</u> iPS will redirect you to a separate screen where you can update the received quantity.
2 of 4	a) Change the value in the Received Qty field. b) Enter the reason for the return in the Return Reason field. c) Optionally, change the warehouse where the merchandise was received, by selecting the appropriate value from the drop-down list in the Warehouse field. <u>NOTE:</u> Depending on company policy, damaged merchandise may be returned to the Damaged Inventory warehouse. <u>NOTE:</u> Value in the Received Qty field may never exceed the value in the Return Qty field.
3 of 4	Click the [Update] button. <u>NOTE:</u> The system will automatically increase inventory of the returned merchandise for the warehouse specified. Click on the Product Transactions link to view the transaction record.
4 of 4	Click the Back to Return link, which will redirect you to the main return maintenance screen.

Manually Issue Return Payment - Same Payment Method

After reviewing and updating the return information, you may manually issue a return payment to the customer. To use same payment method as the one initially used to pay the order, follow these steps.

Step	Action
1 of 4	a) Click the [Issue Return Payment] button. b) Click OK to confirm, otherwise select cancel. <u>NOTE:</u> [Issue Return Payment] button will only appear on screen once the value in the Return Status field has changed to "Accepted". In other words, all items within the return have been received back at a warehouse.

Manually Issue Return Payment - Different Payment Method

After reviewing and updating the return information, you may manually issue a return payment to the customer. To use a different payment method as the one initially used to pay the order, follow these steps.

Step	Action
1 of 2	a) When alternative payment method is a credit card that the customer has on file, choose the appropriate card from the drop-down list in the Choose an Existing Credit Card field. b) When alternative payment method is another method, choose the appropriate method from the drop-down list in the Payment Method field. NOTE: Choose an Existing Credit Card and Payment Method fields will only appear once the value in the Return Status field has changed to "Accepted". In other words, all items within the return have been received back at a warehouse.
2 of 2	a) Click the [Accept Payment] button. b) Click OK to confirm, otherwise select cancel. NOTE: [Accept Payment] button will only appear once the value in the Return Status field has changed to "Accepted". In other words, all items within the return have been received back at a warehouse.

Manually Recuperate Sales Tax

After manually issuing a return payment (including sales tax) to the customer, you may reclaim the sales tax for the return from the third party tax calculation service, such as CertiTAX.

Step	Action
1 of 1	a) Click the link that takes you to the third party tax calculation service (e.g., CertiTAX). b) Follow instructions to recuperate the sales tax. NOTE: Third party tax calculation service link will only appear once the value in the Return Status field has changed to "Accepted". In other words, all items within the return have been received back at a warehouse.

Make a Warehouse Transfer

You may manually transfer items across warehouses that are owned and operated by your company or any of its members.

Step	Action
1 of 4	Select from menu: Fulfillment Warehouse Transfer
2 of 4	Specify the transfer criteria. a) From the drop-down lists, select the warehouses where you want to transfer items from and to. b) Enter a member number in case the warehouse is member-operated. c) Enter the product number of the item you want to transfer, and indicate the quantity. <u>NOTE:</u> Optionally, you may enter a comment regarding the transfer in the Comments field.
2 of 2	c) Click the [Transfer Product] button. d) Click OK to confirm, otherwise select cancel.

Web Order Entry

inPowerSuite (iPS) provides easy-to-use shopping functions that allow you to quickly locate and display products, and subsequently add them to the shopping cart. The shopping functionality consists of following pages and plug-ins.

Shopping Pages

- ☐ Default Store Page
- ☐ Product Listing Page
- ☐ Product SCS Group
- ☐ Proximity Listing Page
- ☐ More Info Page

Shopping Plug-ins

- ☐ E-Commerce Bar
- ☐ Category Navigation Bar
- ☐ Product Search Plug-in
- ☐ Proximity Search Plug-in
- ☐ Up-sell Plug-in
- ☐ Side-sell Plug-in
- ☐ Quick Order Plug-in

Default Store Page

This page is displayed upon entry of the Web store and typically showcases items from the "FEATURED PRODUCTS" category.

Step	Action
1 of 1	To return to the default store page: a) Click the Shopping (or Our Products) link on the E-Commerce bar, or b) Click the [Continue Shopping] button underneath the cart.

E-Commerce Bar

A navigation bar that is visible on each page of the Web store. It provides links to the Shopping Pages, Cart, Checkout, Order Tracking, MyAccount area and Sign In/Out sections of the Web store.

Category Navigation Bar

The Category Navigation Bar is typically positioned on either the left or right side of the page, and provides quick access to a list of products within a certain product category. Usually, this bar is visible on all shopping pages.

Step	Action
1 of 2	From the default store page, click a category node in the Category Navigation Bar to view the list of products that are included in this category. <u>NOTE:</u> Items on the list are always arranged according to an explicit sort order criterion.

Step	Action
2 of 2	Depending on the store configuration, select an item from the category list as follows: a) Click the item's image link to view the item's style/color/size options, or b) Click the [Options] button to view the item's style/color/size options, or c) Click the [Buy] button to place the item into the cart. NOTE: When applicable, the Category Navigation Bar will expand to display subcategories under the selected category node. Any previously visible sub-categories will be collapsed.

Product Listing Page

Displays the products that make up a selected category. Items on the list are arranged according to an explicit sort order criterion.

Step	Action
1 of 1	Depending on store configuration, click the small image or More Info link for any item to view the product details, or Click the [Buy] button to place the item into the cart, or Click the [Options] button to view the item's style/color/size options.

Product Search Plug-in

Find items in the online catalog by performing a keyword search.

Step	Action
1 of 2	Enter your keyword in the search box (if available) and click the [GO] button to obtain a list of products that match your search. NOTE: The Product Search Plug-in allows you to find items by product number, name or any other descriptive information. TIP: Use the percent (%) character before and/or after the search argument to perform inexact searches. For example, to find: ☐ Products having a similar name starting with "ipod", enter ipod% ☐ Products having a similar name ending with "boot", enter %boot ☐ Products having a similar name containing "diamond", enter %diamond%

Step	Action
2 of 2	Select an item from the product list by clicking the item's image or the More info link, or Click the [Buy] button to place the item into the cart.

Proximity Search Plug-in

Find products in the catalog by postal code.

Step	Action
1 of 2	Enter a postal code in the Proximity Search Plug-in (if available) and click the [GO] button, or Select a Metropolitan area from the drop-down list to obtain a list of products that are grouped by geographic proximity. TIP: Use the percent (%) character before and/or after the search argument to perform inexact searches. For example, to find: ☐ Products from postal codes starting with "100", enter 100% ☐ Products from postal codes ending with "00", enter %00 ☐ Products from postal codes containing "00", enter %00%
2 of 2	Select an item from the product list by clicking the item's image or the More info link, or Click the [Buy] button to place the item into the cart.

Proximity Listing Page

Displays top ranking items in an area by category, whereby items match your proximity search on geographical relevance (in distance).

Step	Action
1 of 1	Click any category link for a complete list of matching items in a specific area, or Click any link for an item to view the product details.

Product SCS Group

Displays items that belong to a special Style-Color-Size (SCS) group. Typically items with common descriptions and images, but with variations in style, color or size are grouped within a specific Product SCS Group. Examples are apparel, jewelry, and other items with sub SKUs.

Step	Action
1 of 2	Click the item's image or the [Options] button from the product list to view all items within the Style/Color/Size group.
2 of 2	Select items by entering the quantities the customer wants to buy. Subsequently, click the [Buy] button to add the selected items to the cart.

More Info Page

Displays all information for the selected item, such as image, long description, offer details, retail and volume pricing, and any up-sell related items.

Step	Action
1 of 1	Click the small image or More Info link for an item to view the item's more info page.
2 of 2	Click the [Buy] button to add the item to the cart.

Up-sell Plug-in

Displays items having a "good-better-best" relationship to the item(s) you are viewing.

Step	Action
1 of 1	Click the small image or More Info link for the related item to view the product details.
2 of 2	Click the [Buy] button to add this item to the cart. <u>NOTE:</u> Up-sell items are always displayed on the More Info page.

Side-sell Plug-in

Displays items having a “complimentary” relationship to the item(s) that have been placed in the cart.

Step	Action
1 of 1	Click the name link of any related item to view its details, or Click the price link to add the related item to the cart. <u>NOTE:</u> Side-sell items are always displayed on the cart page. <u>NOTE:</u> The complimentary item is eliminated from the side-sell plug-in once you add it to the cart. Correspondingly, the item returns to the side-sell plug-in when you remove it from the cart.

Quick Order Plug-in

Displays an order entry pad, by-passing the storefront shopping categories.

Step	Action
1 of 4	Click the Quick Order link on the Storefront to launch the order entry pad. <u>NOTE:</u> iPS will allow the items to be selected from the shopper’s pricelist.
2 of 4	a) Enter one item (SKU) number per row. <u>NOTE:</u> iPS automatically displays matching SKUs until you select one and iPS Or b) Click [...] for a pop-up list of items on the shopper’s pricelist. Then select an item for the row. <u>NOTE:</u> iPS displays the item short description, price, line total, points and volume.
3 of 4	Adjust the item quantity on the row as needed. <u>NOTE:</u> iPS automatically updates line total, points and volume.
4 of 4	Repeat step2 until all items are added to the cart then click [Checkout]. <u>NOTE:</u> The Quick Order pad initially displays 10 rows and will accommodate up to 100 rows of items in the cart.

Cart Operations

inPowerSuite (IPS) provides standard, easy-to-use shopping cart functions that allow you to add and remove items, change quantities, and apply item-level discounts prior to checking out from the Web store. Cart functions are described below.

- ☐ Viewing the Cart
- ☐ Adding an Item to the Cart
- ☐ Removing an Item from the Cart
- ☐ Changing the Item Quantity
- ☐ Redeeming Item-level Coupons
- ☐ Continue Shopping
- ☐ Checkout

Viewing the Cart

The cart contains all items that have been selected to purchase.

Step	Action
1 of 1	a) Click the Cart link on the E-Commerce bar, or b) Click the graphical floating cart (if available) from any storefront page. <u>NOTE:</u> You cannot view an <i>empty</i> cart.

Adding an Item to the Cart

Step	Action
1 of 1	Click the [Buy] button to place the item into the shopping cart.

Removing an Item from the Cart

Step	Action
1 of 1	Click the Remove link to delete any line from the cart. <u>NOTE:</u> After removing a line from the cart, the subtotal will automatically be recalculated. <u>NOTE:</u> After removing the last line from the cart, the system will redirect you to the default store page.

Changing the Item Quantity

Step	Action
1 of 2	Change the quantity for one or multiple lines in the cart.
2 of 2	Click the [Change Quantity] button to recalculate the cart subtotal.

Redeeming Item-level Coupons

Step	Action
1 of 2	Click the Coupon link for any line in the cart.
2 of 2	Enter a coupon code in the designated space; subsequently click the [Apply Coupon] button. <u>NOTE:</u> If the entry is valid, the cart subtotal will be updated to reflect the coupon discount. Otherwise, a coupon error will be displayed.

Continue Shopping

Choose any of the options below to continue browsing items in the catalog.

Step	Action
1 of 1	If side-sells are available, click a name or price link in the plug-in to view a related item, or Click a category node in the Category Navigation Bar to view a specific product list. Click the [Continue Shopping] button underneath the cart, or Click the Shopping (or Our Products) link on the E-Commerce bar to return to the default store page. <u>NOTE:</u> Side-sell items are always displayed on the cart page.

Checkout

Start the checkout process to purchase the items in the cart.

Step	Action
1 of 1	Click the [Checkout] button underneath the cart, or Click the Checkout link on the E-Commerce bar. TIP: Sign in (from the E-Commerce bar) before starting the checkout process if the customer is a returning customer. <u>NOTE:</u> After signing in, the cart will automatically update to reflect the customer's pricing arrangement.

Checkout Functions

inPowerSuite (IPS) provides a flexible, step-driven process to perform secure order checkout, for both new and returning customers.

The links below provide a summary of the checkout steps required for both new and returning customers.

New Customer Checkout Summary

Returning Customer Checkout Summary

- ☐ Creating a Billing Profile
- ☐ Shipping Destination/Profiles
- ☐ Selecting a Shipping Method
- ☐ Redeeming Order-level Promotions
- ☐ Continuity (Autoship) Options
- ☐ Payment Options
- ☐ Order Confirmation

New Customer Checkout Summary

Follow the simple 6-step process to complete the first order of a new customer.

Step	Action
1 of 6	To start, click the [Checkout] button underneath the cart, or Click the Checkout link on the E-Commerce bar.
2 of 6	Create a billing profile, username/password, and optionally select the member who referred the customer into the organization (click the Search link next to the field, find the appropriate person, and click the name link to select the person from the list).
3 of 6	If needed, create a separate shipping address (uncheck the checkbox that designates the billing address as the shipping address, and follow the steps after clicking the [Continue] button). Otherwise, the billing address will automatically be designated as the delivery address.
4 of 6	Select a shipping method for delivering the items.
5 of 6	a) Review the order details. b) Optionally, click the Promotion link to redeem an order-level discount. Enter a Promotion Code in the designated space; subsequently click the [Redeem Promotion] button. <i><u>NOTE:</u></i> If the entry is valid, the order total will be updated to reflect the promotional discount. Otherwise, a Promotion Error will be displayed. c) Select a payment method, enter payment information and submit for authorization.

Step	Action
	TIP: You may save the customer's payment information for future orders by checking the Save this New Credit Card on File for Future box.
6 of 6	Print the Invoice for the purchase. NOTE: The system will automatically send an order confirmation to the customer's email address designated on the billing profile.

Returning Customer Checkout Summary

Returning customers may follow this simple process to complete their orders.

Step	Action
1 of 6	a) Click the Sign In link on the E-Commerce bar; subsequently enter the username and password to log in. b) Click the Checkout link on the E-Commerce bar to start the checkout process.
2 of 6	Select one of the existing billing profiles and continue, or Create a new profile and continue.
3 of 6	Select one of the existing shipping profiles and continue, or Create a new shipping profile and select it before continuing.
4 of 6	Select a shipping method for delivering the items.
5 of 6	a) Review the order details. b) Optionally, click the Promotion link to redeem an order level discount. Enter a Promotion Code in the designated space; subsequently click the [Redeem Promotion] button. NOTE: If the entry is valid, the order total will be updated to reflect the promotional discount. Otherwise, a Promotion Error will be displayed. c) Select one of the existing payment methods and submit it for authorization. Otherwise, select a new payment method, enter new payment information, and submit

Step	Action
	for authorization. TIP: You may save the customer's payment information for future orders by checking the Save this New Credit Card on File for Future box. <u>NOTE:</u> If the payment is invalid, please correct the information and resubmit for authorization.
6 of 6	Print the Invoice for the purchase. <u>NOTE:</u> The system will automatically send an order confirmation to the customer's email address designated on the billing profile.

Creating a Billing Profile

Setup a billing profile for the order.

Step	Action
1 of 3	Create a billing profile, consisting of a street address, email address, username and password.
2 of 3	Optionally, select the member who referred the customer into the organization (click the Search link next to the field, find the appropriate person, and click the name link to select the person from the list).
3 of 3	Optionally, designate the billing address as the shipping destination and continue. TIP: Uncheck the checkbox that designates the billing address as the shipping address, and follow the steps after clicking the [Continue] button to enter a different delivery address.

Shipping Destination/Profiles

Designate shipping destination(s) for the order.

Step	Action
1 of 3	When the "Split Shipment" option is available, you may indicate a separate shipping

Step	Action
	entire order from the address drop-down list. TIP: To split shipments within the same order, multiple lines must be created in the cart.
2 of 3	Optionally, click the [New Shipping Address] button and create a new shipping destination.
3 of 3	Select the new shipping address from the drop-down list and continue.

Selecting a Shipping Method

Pick a shipping method for each destination on the order.

Step	Action
1 of 1	Select the shipping method from the drop-down lists for delivery to each shipping destination on the order, and continue. TIP: Click the Click here for more information link to learn more about the shipping methods, and specific terms and rules.

Redeeming Order-level Promotions

Enter a promotion code to obtain a discount on the order.

Step	Action
1 of 2	Click the Promotion link to redeem an order level discount.
2 of 2	Enter a Promotion Code in the designated space; subsequently click the [Redeem Promotion] button. <i>NOTE:</i> If the entry is valid the order total will be updated to reflect the promotional discount. Otherwise, a Promotion Error will be displayed.

Autoship (Continuity) Options

Step	Action
1 of 1	If available, check the Autoship box to set up items in this order for automatic reordering. TIP: Click the Autoship link (next to the checkbox) to learn about the specific terms, rules and frequency of the autoship program. <u>NOTE:</u> Only autoship-enabled items may be set up in the autoship program. TIP: Autoship items can be reviewed and maintained in the MyAccount area.

Payment Options

iPS provides a secure method for collecting and processing order payments. Typically, the payment page will be served in HTTPS mode (as indicated in your browser's address bar) to protect capture and transmission of the payment information.

Step	Action
1 of 1	Select a payment method, enter payment information and submit it for authorization. TIP: You may save the customer's payment information for future orders by checking the Save this New Credit Card on File for Future box. Or, select one of the existing payment methods and submit it for authorization. <u>NOTE:</u> If the payment is invalid, please correct the information and resubmit for authorization.

Order Confirmation

The final step in the order process allows you to print a receipt of the purchase.

Step	Action
1 of 2	Print the Invoice for the purchase. <u>NOTE:</u> An order confirmation will automatically be sent by email to the email address provided in the billing profile.
2 of 2	Click the New Order link to place another order, or Click the MyAccount link on the E-Commerce Bar to manage account settings, or Click the Sign Out link on the E-Commerce Bar to end the shopping session.

Member Application Process

inPowerSuite (iPS) provides a robust, self-serve application process for registering new independent business owners (IBOs) (or Member) into the organization. Both Customer Service Representatives (CSRs) and new enrollees may complete an online application.

Below is a summary of the process.

- ☐ Application Process Summary
- ☐ Selecting Products
- ☐ Identifying the Enroller and Sponsor
- ☐ Business Information
- ☐ New Member Email
- ☐ Up-line Notification Emails

Application Process Summary

Step	Action
1 of 5	From the corporate Website, click the Join (or Join Now) link to start the application process. <u>NOTE:</u> A membership item (application kit) will automatically be added to the cart.
2 of 5	Create a billing profile, enter username and password, and optionally select the member's enroller and sponsor (click the Search link next to the field, find the appropriate person, and click the "name" link to select the person from the list). a) Optionally, create a shipping address. Otherwise the billing address will automatically be designated as the delivery address.
3 of 5	Select a shipping method for delivering the items.
4 of 5	Select a payment method, enter payment information and submit it for authorization. <u>NOTE:</u> The payment information may be saved for future orders.
5 of 5	Print the Invoice for the purchase. <u>NOTE:</u> The new member as well as his/her sponsor will receive a notification of the enrollment by email.

Selecting Products

Choose additional products with the membership.

Step	Action
1 of 1	If available, select any of the predefined bundles, then continue the signup process, or Choose the option to select the items directly from the store and continue the signup process. NOTE: With either option, the default membership item (starter kit) will automatically be added to the cart.

Identifying the Enroller and Sponsor

While creating a new member application, existing members within the organization may be indicated as the enroller or sponsor. Specifically:

- Enroller The person responsible for recruiting the new member into the business.
- Sponsor The person who will manage and mentor the new member. Typically, referred to as the “up-line” member.

Step	Action
1 of 2	If available, enter the enroller’s pin number in the Enroller field, or Click the Search link next to the field, find the enroller, then click the “name” link to select the enroller from the list. TIP: The enroller can simultaneously be selected as the sponsor.
2 of 2	Optionally, enter the sponsor’s pin number in the Sponsor field, or Click the Search link next to the field, find the sponsor, and click the “name” link to select the sponsor from the list.

Business Information

In order to properly establish someone as an independent business owner (IBO) (Member), he/she must provide some information about the business.

Step	Action
1 of 3	Under Business Information, choose the legal entity/business type from the drop-down list.
2 of 3	Enter the tax number (SSN or EIN).
3 of 3	Optionally enter the company and/or partner names.

New Member Welcome Email

Upon successful completion of an application, the new member will receive an email notification with important information regarding the business membership, including a unique member number and contact information of the enroller and sponsor.

Up-line Notification Emails

The sponsor will also receive an email notification indicating that a new member has successfully completed the business application. This email includes the new member's contact details.

NOTE: When the new member in turn becomes the sponsor of another new member, he/she will become the recipient of this up-line notification email.

Notes
