Frontend Modules

inPowerSuite provides mobile ready application modules offering a clean, uncluttered and intuitive user interface that seamlessly blend with the company's branding and corporate website.

Web Store

inPowerSuite supports flexible shopping arrangements including direct to consumer (b2c), member's only (b2b), and party guest orders (b2b2c).

Features:

- Flexible product categorization, searches and display styles
- Flexible merchandising arrangements for product offers (BOGOs), mix and match items, style-color-size items, product kits, product bundles, volume-pricing, up-sells, side-sells, and back-order arrangements
- Multiple order entry modes including quick order, autoship, party, point of sale, and member application enrollment; all managed via web and mobile platforms

Order Checkout options...

- Express order checkout
- New customer and new member checkout
- Real-time address validation, sales tax look-up and payment processing
- Auto-responders for order confirmation, customer and member welcome letters, and up-line notifications

Member Enrollment

inPowerSuite provides a comprehensive and customizable member enrollment module for self-serve and up-line initiated new member sign-ups.

Features:

- Custom fields
- Sponsor lookup (multi-country ready)
- Multiple products and kits
- Flexible payment options
- Downloadable terms and conditions
- Welcome letters and up-line notifications

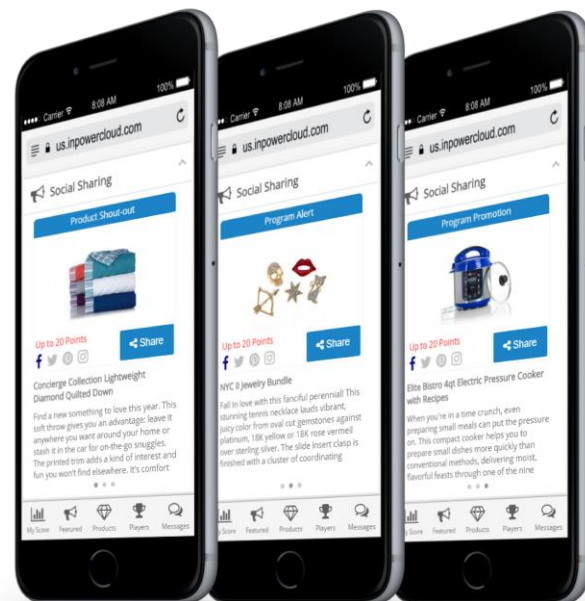

Social Selling

inPowerSuite supports promoting products and store discounts across a variety of social media platforms, including:

- Facebook
- Twitter
- Pinterest
- Instagram and others

Members and customers connect to their favorite social media sites (one time only) to share time-sensitive product specials with friends and relatives to earn points.

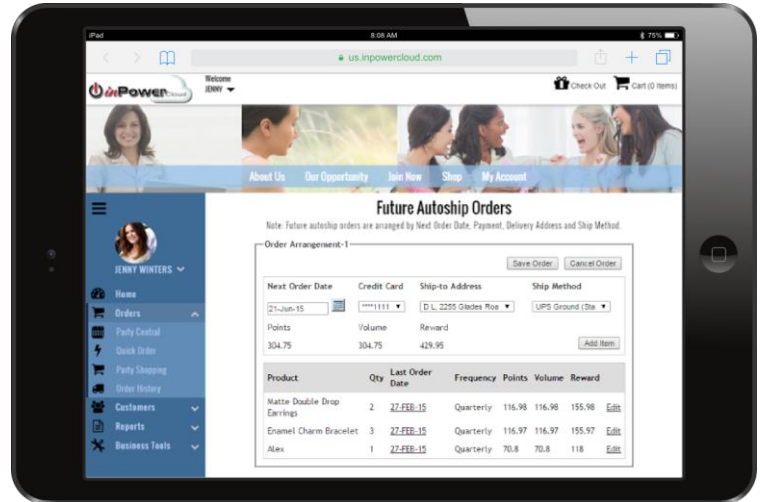

inPowerSuite tracks all social shares and awards loyalty points to each member and customer.

Autoship-Continuity Ordering

Supports replenishment orders containing consumable products driven by user defined frequency

- Designate any web order for autoship
- Configurable products, blackout dates, and autoship discounts
- Continuity ordering and multi-frequency reordering
- Autoship queues and batching
- Credit card declination auto-responder notifications

Point of Sale

Mobile ready solution built for tablet devices to perform floor/counter sales and exchanges.

Features:

- Transact sales directly on floor by credit card
- Lookup customers and referrers while ordering
- Apply multiple discounts including coupons, promo codes and offers
- Print or email order confirmation
- Integrates with cash drawer, card reader, wireless scanner and receipt printer*
- Cash drawer management and end of day reports

(*) Requires additional POS equipment.

Replicated Websites

inPowerSuite provides powerful tools for members to create personalized websites and promote products and business opportunities. Features:

Lead Protection

Visitors to personal websites are tagged to provide the website owner with lead-protection, such that the member gains valuable customer leads, earns volume from product orders, and becomes the sponsor of new applicants who join the business.

Simple Website Signup Process

Members are allowed to subscribe to their company's approved personal websites from the member's business portal or during new member enrollment.

Website Wizard

Simple tool for members to create and maintain unlimited websites under the umbrella of the company. Features:

- A rich selection of multi-lingual website templates
- Tools to manage personal content (i.e. images, biography, personal and product testimonies, meta-tags (for search engines) and more.

Website Compliance Monitor

Company users have the ability to monitor websites, preview, reject or publish site changes initiated by members. Additionally content filters can be configured to screen illicit words and phrases in the personal websites.

Website Autoresponders

inPowerSuite provides personalized electronic notifications to website owners and company staff based on a variety of website events and activities.

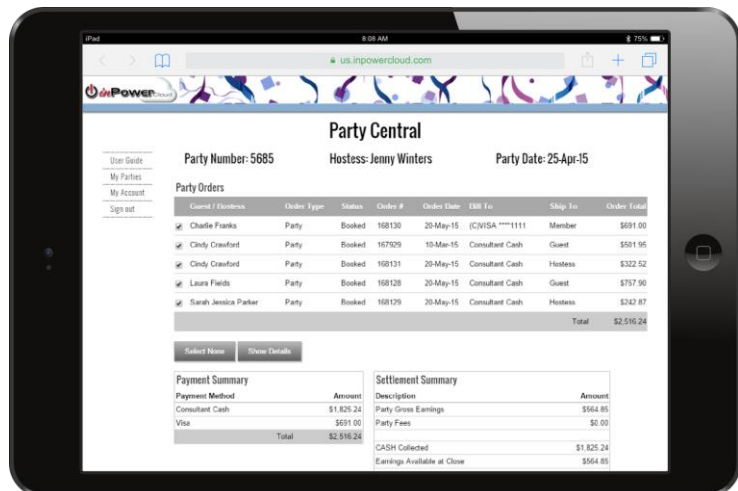

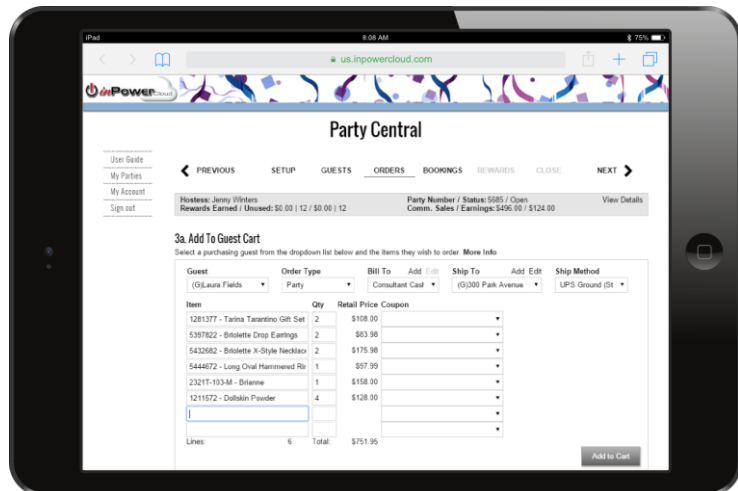

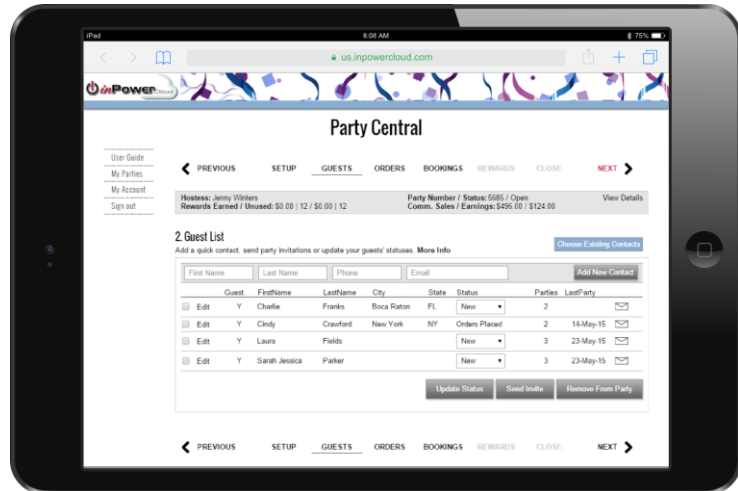

Party Central

inPowerSuite provides a robust module for the sales consultant and her designated host to plan and manage parties for multiple party types.

Features:

- Multiple auto-responders by party type including public parties.
- Rules driven host rewards
- Easy to manage party schedule
- Host and guest e-vites per party type
- Host portal for managing guest list
- RSVP/attendance tracking and follow-up auto-responders
- Configurable shipping / payment rules
- Multiple order types for pre-party / party / hostess rewards and settling orders
- Capture future bookings
- Cash out or bank retail earnings at party settlement
- Single party shipment or individual guest shipments.
- Multiple reports

Note: Party Management can be configured for additional member managed ordering scenarios.

Business Portal (user back-office)

inPowerSuite provides secured access to an extensive set of information portlets, business tools, reports and content by customer type.

Dashboards

inPowerSuite provides configurable, visually stunning and easy-to-use dashboards by customer type.

Features...

- Collapsible menu system for managing orders, customers, business tools, reports, profile and dozens of collapsible portlets
- Multiple sales goals by period
- Time sensitive announcements, news, guides, and more
- Video carousel
- Multiple key performance indicators (KPIs)
- Calendar with multiple events per party
- Multiple banners and recognition portlets for Top -Sales, -Earners, -Promotions, and more.

Sales, Genealogy and Commission Reports

inPowerSuite provides a large set of canned operational and analytical reports.

- Reports for sales by frontline, customer, product and party.
- Dozens of configurable Google charts by data point, colors and chart types and options
- Graphical and linear genealogy views and
- Commission activity statements
- eWallet statements

Business Tools

Leads Manager

- Find consultants / sales rep by name or graphical proximity
- Track and communicate with new leads
- Leads reassignment

Contact Manager

- Manage leads and customer profiles
- Add notes

List Manager

Create multiple marketing lists for leads and customers based on purchasing needs/activity

Email Manager

Generate an email blast to a target mail list

Print Mail Manager

- Manage subscription based printing of catalogs, flyers, and seasonal specials, etc. to a target mailing list
- Generate fee order to sales rep based on content and number of mail list recipients
