

Multi Language Support

V1.0

Niche Applications, Inc.

copyright © 2012

Overview

iPS provides native support for many single- and double-byte languages using Unicode character set on the Oracle platform.

The link below demonstrates iPS running multiple languages for a single product.

http://us.inpowerdemo.com/pls/ngs/ngs_instore.show_product_listing?fn_category_id=4169&fn_product_id=117340

Note: Your PC/Browser needs the necessary fonts to show Laotian (Laos) and Khmer (Cambodian) double-byte characters; otherwise you will see little square boxes for each character in the browser.

Supported Languages

In addition to all Latin based single-byte languages (i.e. English, French, Spanish, German, Dutch etc.), below is partial list double-byte languages natively supported by iPS.

#	Language Name	Abbreviation
